**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD ENDED 31 MARCH 2017**

**1. The Company**

Conoil Plc ("The Company") was incorporated in 1960. The Company's authorised share capital is 700,000,000 ordinary shares of 50k each.

The Company was established to engage in the marketing of refined petroleum products and the manufacturing and marketing of lubricants, household and industrial chemicals.

**1.1 Composition of Financial Statements**

The financial statements are drawn up in Nigerian Naira, the financial currency of Conoil Plc, in accordance with IFRS accounting presentation. The financial statements comprise:

- Statement of profit or loss and other comprehensive income
- Statement of financial position
- Statement of changes in equity
- Statement of cash flows
- Notes to the financial statements

Additional information provided by the management includes:

- Value added statement

**1.2 Financial period**

These financial statements cover the financial period from 1 January 2017 to 31 March 2017 with comparative figures for the financial year from 1 January 2016 to 31 March 2016.

**2. Adoption of new and revised International Financial Reporting Standards (IFRS) and Interpretations by the International Financial Reporting Interpretations Committee (IFRIC)**

**Accounting standards and interpretations issued but not yet effective**

The following revisions to accounting standards and pronouncements that are applicable to the Company were issued but are not yet effective. Where IFRSs and IFRIC interpretations listed below permit early adoption, the Company has elected not to apply them in the preparation of these financial statements.

The full impact of these IFRSs and IFRIC Interpretations is currently being assessed by the company, but none of these pronouncements are expected to result in any material adjustments to the financial statements.

**Effective for the financial year commencing 1 January 2017**

- Amendments to IAS 7: Disclosure Initiative

**Effective for the financial year commencing 1 January 2017**

- Amendments to IAS 12: Recognition of Deferred Tax Assets for Unrealised Losses

**Effective for the financial year commencing 1 January 2018**

- Amendments to IFRS 2: Classification and Measurement of Share-based Payment Transactions

**Effective for the financial year commencing 1 January 2018**

- IFRS 9 Financial Instruments

**Effective for the financial year commencing 1 January 2018**

- IFRS 15 Revenue from Contracts with Customers

**Effective for the financial year commencing 1 January 2019**

- IFRS 16 - Leases

NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD ENDED 31 MARCH 2017

2. Accounting standards and interpretations issued but not yet effective (continued)

All standards and interpretations will be adopted at their effective date and their implications on the Company are stated below:

Standard/Interpretation not yet effective as at 31 December 2016		Date issued by IASB	Effective date Periods beginning on or after	Summary of the requirements and assessment of impact
IAS 7	Disclosure Initiative	29 January 2016	1 January 2017 Early adoption is permitted	This amends IAS 7 Statement of Cash flow to clarify that entities shall provide disclosures that enable users of the financial statements to evaluate changes in liabilities arising from financial activities. The Company will adopt the amendments for the year ending 31 December 2017.
IAS 12	Recognition of Deferred Tax Assets for Unrealised Losses	19 January 2016	1 January 2017 Early adoption is permitted	The amendment to IAS 12 Income Taxes clarifies the following aspects: <ul style="list-style-type: none"> <li>Unrealised losses on debt instruments measured at fair value and measured at cost for tax purposes give rise to a deductible temporary difference regardless of whether the debt instrument's holder expects to recover the carrying amount of the debt</li> </ul> The Company will adopt the amendments for the year ending 31 December 2017.
IFRS 9	Financial Instruments	24 July 2014	1 January 2018 Early adoption is permitted	The IASB issued the final IFRS 9 Financial Instruments Standard, which replaces earlier versions of IFRS 9 and completes the IASB's project to replace IAS 39 Financial Instruments: Recognition and Measurement.  This standard will have a significant impact on the Company, which include changes in the measurement bases of the Company's financial assets to amortised cost, fair value through other comprehensive income or fair value through profit or loss. Even though these measurement categories are similar to IAS 39, the criteria for classification into these categories are significantly different. In addition, the IFRS 9 impairment model has been changed from an "incurred loss" model from IAS 39 to an "expected credit loss" model, which is expected to increase the provision for bad debts recognised in the Company.  The amendments apply retrospectively. The Company will adopt the amendments for the year ending 31 December 2018.

NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD ENDED 31 MARCH 2017

2. Accounting standards and interpretations issued but not yet effective (continued)

Standard/Interpretation not yet effective as at 31 December 2016		Date issued by IASB	Effective date Periods beginning on or after	Summary of the requirements and assessment of impact
IFRS 2	Classification and Measurement of Share-based Payment Transactions	20 June 2016	1 January 2018 Early adoption is permitted	This clarifies the standard in relation to the accounting for cash-settled share-based payment transactions that include a performance condition, the classification of share-based payment transactions with net settlement features, and the accounting for modifications of share-based payment transactions from cash-settled to equity-settled.
IFRS 15	Revenue from contract with customers	28 May 2014	1 January 2018 Early adoption is permitted	<p>This standard replaces IAS 11 construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfer of Assets from Customers and SIC-31 Revenue – Barter of Transactions Involving advertising Services.</p> <p>The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognised.</p> <p>This new standard will most likely have a significant impact on the Company, which will include a possible change in the timing of when revenue is recognised and the amount of revenue recognized.</p> <p>The Company will adopt the amendments for the year ending 31 December 2018.</p>

NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD ENDED 31 MARCH 2017

2. Accounting standards and interpretations issued but not yet effective (continued)

Standard/Interpretation not yet effective as at 31 December 2016		Date issued by IASB	Effective date Periods beginning on or after	Summary of the requirements and assessment of impact
IFRS 16	Leases	13 January 2016	1 January 2019	<p>Under IFRS 16, the distinction made up to now between operating leases and finance leases will no longer apply with respect to the lessee. For all leases, the lessee recognizes a right of use to an asset and a lease liability. The right of use is amortized over the contractual term in line with the rules for intangible assets. The lease liability is recognized in accordance with the rule for financial instruments pursuant to IAS 39 (or IFRS 9 in future). Write-downs on the asset and interest on the liability are presented separately in the income statement. There are exemptions when accounting for short-term leases and low-value leased assets.</p> <p>The disclosures in the notes to the financial statements will be extended and should provide a basis for users to assess the amount, timing as well as uncertainties in relation to leases.</p> <p>For lessors, however, the rules in the new standard are similar to the previous rules in IAS 17. They will continue to classify leases either as a finance lease or an operating lease.</p> <p>The directors of the Company do not anticipate that the application of these amendments to IFRS 16 will have any impact on the Company's financial statements.</p>

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 3. Significant accounting policies

#### 3.1 Statement of compliance

The annual financial statements are prepared in accordance with International Financial Reporting Standards (IFRSs) and the requirements of the Companies and Allied Matters Act (CAMA) and the Financial Reporting Council of Nigeria Act.

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. The principal accounting policies adopted are set out below.

#### 3.2 Accounting principles and policies

The financial statements have been prepared in accordance with the Company's accounting policies approved by the Board of Directors of the Company.

#### 3.3 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business, net of discounts and sales related taxes (where applicable).

Exchanges of petroleum products within normal trading activities do not generate any income and therefore these flows are shown at their net value in both the statement of profit or loss and other comprehensive income and the statement of financial position.

##### 3.3.1 Sale of goods

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

##### 3.3.2 Interest revenue

Interest income is recognised when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

##### 3.3.3 Service income

Service income represents income from Entity's property at service stations while rental income represents income from letting of the entities building. Both service income and rental income are credited to the statement of comprehensive income when they are earned.

#### 3.4 Foreign currency translation

The financial statements of the Company are prepared in Nigerian Naira which is its functional currency and presentation currency.

In preparing the financial statements, transactions in currencies other than the Company's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting year, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 3. Significant accounting policies (Continued)

#### 3.5 Pensions and other post-employment benefits

The Company operates a defined contribution pension plan for its employees and pays fixed contributions into a separate entity. The Company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior years.

In addition, payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

The Company also operated a gratuity scheme for its qualified employees prior to 2008 which it has discontinued.

#### 3.6 Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

##### 3.6.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted at the reporting date.

##### 3.6.2 Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset is realised based on tax laws and rates that have been enacted at the reporting date. Deferred tax is charged or credited in the statement of comprehensive income, except when it relates to items charged or credited in other comprehensive income, in which case the deferred tax is also dealt with in other comprehensive income.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

#### 3.7 Property, plant and equipment

Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes, are stated in the statement of financial position at cost less accumulated depreciation and accumulated impairment losses.

The initial cost of the property plant and equipment comprise of its purchase price or construction cost, any directly attributable cost to bringing the asset into operation, the initial estimate of dismantling obligation (where applicable) and any borrowing cost.

**3. Significant accounting policies (Continued)**

**3.7 Property, plant and equipment (Continued)**

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and assets under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting year, with the effect of any changes in estimate accounted for on a prospective basis. The basis for depreciation is as follows:

	Estimated useful life range	Rate
Freehold land and Buildings	20 - 50 Years	5%
Leasehold land and buildings	20 - 50 Years	Over the period of the lease
Plant and machinery	5 - 10 Years	15%
Motor vehicles	2 - 5 Years	25%
Furniture, fittings and equipment:		
- Office furniture	3 - 12 Years	15%
- Office equipment	5 - 15 Years	15%
- Computer equipment	2 - 10 Years	33.33%
Intangible Assets - Software	5 - 10 Years	10%

Freehold land and Assets under construction are not depreciated.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

**3.8 Intangible assets**

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets are amortised on a straight-line basis over the following periods:

Software	10 Years
----------	----------

Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset is measured as difference between the net disposal proceeds and the carrying amount of the asset are recognised as profit or loss when the asset is derecognised.

**3.9 Investment property**

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes).

The initial cost of the investment property comprise of its purchase price or construction cost, any cost directly attributable to bringing the asset into operation, the initial estimating of dismantling obligation (where applicable) and any borrowing cost.

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and assets under construction) less their residual values over their useful lives, using the straight-line method.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting year, with the effect of any changes in estimate accounted for on a prospective basis. The basis for depreciation is as follows:

Leasehold land and buildings	20 Years
------------------------------	----------

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year in which the property is derecognised.

**3. Significant accounting policies (Continued)**

**3.10 Impairment of long lived assets**

The recoverable amounts of intangible assets and property, plant and equipment are tested for impairment as soon as any indication of impairment exists. This test is performed at least annually. The recoverable amount is the higher of the fair value (less costs to sell) or its value in use.

Assets are grouped into cash-generating units (or CGUs) and tested. A cash-generating unit is a homogeneous group of assets that generates cash inflows that are largely independent of the cash inflows from other groups of assets. The value in use of a CGU is determined by reference to the discounted expected future cash flows, based upon the management's expectation of future economic and operating conditions. If this value is less than the carrying amount, an impairment loss on property, plant and equipment, or on other intangible assets, is recognised either in "Depreciation, depletion and amortization of property, plant and equipment, or in "Other expense", respectively. Impairment losses recognised in prior years can be reversed up to the original carrying amount, had the impairment loss not been recognised.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount in which case the reversal of the impairment loss is treated as a revaluation increase.

**3.11 Non-current assets held for sale**

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

**3.12 Inventories**

Inventories are valued at lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less estimated selling expenses. Cost is determined on weighted average basis and includes all costs incurred in acquiring the inventories and bringing them to their present location and condition.

**3.13 Cash and cash equivalents**

Cash and cash equivalents comprise cash in hand, current balances with banks and similar institutions and highly liquid short term investments that are convertible into known amounts of cash and are subject to insignificant risks of changes in value. Investments with maturity greater than three months or less than twelve months are shown under current assets.

**3.14 Provisions**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

**3. Significant accounting policies (Continued)**

**3.14 Provisions**

- i. Onerous contracts  
Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.
- ii. Restructuring  
A restructuring provision is recognised when the Company has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the Company.

**3.15 Financial instruments**

The Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement. Financial instruments are recognised when the Company becomes a party to the contractual provisions of the instrument.

**3.15.1 Financial assets**

- i. **Recognition**
  - a. Initial recognition and measurement  
Financial assets within the scope of IAS 39 Financial Instruments: Recognition and Measurement are classified as financial assets at fair value through profit or loss, loans and receivables, held to maturity investments and available for sale financial assets. The Company determines the classification of its financial assets at initial recognition.  
All financial assets are recognised initially at fair value plus (in the case of investments not at fair value through profit or loss) directly attributable transaction costs.  
The Company's financial assets include cash and short-term deposits, trade and other receivables and loan and other receivables.

- b. Subsequent measurement  
The subsequent measurement of financial assets depends on their classification as follows:

**Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate method (EIR), less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in statement of profit or loss. The losses arising from impairment are recognised in statement of profit or loss in finance costs for loans and in cost of sales or other operating expenses for receivables.

**Cash and cash equivalents**

Cash and cash equivalents in the statement of financial position comprise cash at banks and at hand and short term deposits with an original maturity of three months or less, but exclude any restricted cash which is not available for use by the Company and therefore is not considered highly liquid.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

**3. Significant accounting policies (Continued)****3.15 Financial instruments****3.15.1 Financial assets****ii. Derecognition**

A financial asset (or, where an applicable part of a financial asset or part of a Company of similar financial assets) is derecognised when:

- The right to receive cash flows from the asset have expired.
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a passthrough arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership.

When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

**iii. Impairment of financial assets**

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred loss event) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtor or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

**iv. Financial assets carried at amortised cost**

For financial assets carried at amortised cost, the Company first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in statement of profit or loss. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income in the statement of profit or loss. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to finance costs in statement of profit or loss.

**3. Significant accounting policies (Continued)****3.15 Financial instruments****3.15.2 Financial liabilities and equity**

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received net of direct issue costs.

Financial liabilities are classified as financial liabilities at fair value through profit or loss; derivatives designated as hedging instruments in an effective hedge; or as financial liabilities measured at amortised cost, as appropriate. Financial liabilities include trade and other payables, accruals, most items of finance debt and derivative financial instruments. The Company determines the classification of its financial liabilities at initial recognition. The measurement of financial liabilities depends on their classification, as follows:

For financial liabilities at fair value through profit or loss, derivatives, other than those designated as effective hedging instruments, are classified as held for trading and are included in this category. These liabilities are carried on the statement of financial position at fair value with gains or losses recognised in the income statement.

For financial liabilities measured at amortised cost, all other financial liabilities are initially recognised at fair value. For interest-bearing loans and borrowings this is the fair value of the proceeds received net of issue costs associated with the borrowing. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses arising on the repurchase, settlement or cancellation of liabilities are recognised respectively in interest and other revenues and finance costs. This category of financial liabilities includes trade and other payables and finance debt.

**i. Recognition****a. Initial recognition and measurement**

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings. The Company determines the classification of its financial liabilities at initial recognition. The Company's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings, financial guarantee contracts, and derivative financial instruments.

**b. Interest-bearing loans and borrowings**

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in statement of profit or loss when the liabilities are derecognised, as well as through the EIR method amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance cost in statement of profit or loss.

**ii. Derecognition**

A financial liability is derecognised when the associated obligation is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in statement of profit or loss.

**3.15.3 Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

**3. Significant accounting policies (Continued)**

**3.15 Financial instruments**

**3.15.4 Fair value of financial instruments**

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include: using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; a discounted cash flow analysis or other valuation model.

**3.16 Creditors and accruals**

Creditors and accruals are the financial obligations due to third parties and are falling due within one year. The outstanding balances are not interest bearing and are stated at their nominal value.

**3.17 Asset retirement obligations**

Asset retirement obligations, which result from a legal or constructive obligation, are recognised based on a reasonable estimate in the year in which the obligation arises. The associated asset retirement costs are capitalized as part of the carrying amount of the underlying asset and depreciated over the useful life of this asset. An entity is required to measure changes in the liability for an asset retirement obligation due to the passage of time (accretion) by applying a risk-free discount rate to the amount of the liability. The increase of the provision due to the passage of time is recognised as part of finance cost.

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 4. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 3, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

#### 4.1 Critical judgments in applying the accounting policies

The following are the critical judgements, apart from those involving estimations (which are dealt with separately below), that the directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

##### 4.1.1 Revenue recognition

In making its judgment, management considered the detailed criteria for the recognition of revenue from the sale of goods set out in IAS 18 Revenue and in particular, whether the entity had transferred to the buyer the significant risks and rewards of ownership of the goods. Based on the acceptance by the customer of the liability of the goods sold, the directors are satisfied that the significant risks and rewards have been transferred and that recognition of the revenue in the current year is appropriate.

##### 4.1.2 Contingent liabilities

During the evaluation of whether certain liabilities represent contingent liabilities or provisions, management is required to exercise significant judgment. Based on the current status, facts and circumstances, management concluded that the dispute with one of its former suppliers (as disclosed in Note 35) should be classified as a contingent liability rather than a provision.

#### 4.2 Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

##### 4.2.1 Useful lives of property, plant and equipment

The Company reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. During the current year, the useful lives of property, plant and equipment remained constant.

##### 4.2.2 Decommissioning liabilities

Estimates regarding cash flows, discount rate and weighted average expected timing of cashflows were made in arriving at the future liability relating to decommission costs.

##### 4.2.3 Impairment losses on receivables

The Company reviews its receivables to assess impairment at least on an annual basis. The Company's credit risk is primarily attributable to its trade receivables. In determining whether impairment losses should be reported in profit or loss, the Company makes judgments as to whether there is any observable data indicating that there is a measureable decrease in the estimated future cash flow. Accordingly, an allowance for impairment is made where there are identified loss events or condition which, based on previous experience, is evident of a reduction in the recoverability of the cash flows.

##### 4.2.4 Allowance for obsolete inventory

The Company reviews its inventory to assess losses on account of obsolescence on a regular basis. In determining whether an allowance for obsolescence should be recorded in profit or loss, the Company makes judgments as to whether there is any observable data indicating that there is any future sellability of the product and the net realizable value of such products. Accordingly, allowance for impairment, if any, is made where the net realisable value is less than cost based on best estimates by the management.

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 4. Critical accounting judgements and key sources of estimation uncertainty (Cont'd)

#### 4.2.5 Valuation of financial liabilities

Financial liabilities have been measured at amortised cost. The effective interest rate used in determining the amortised cost of the individual liability amounts has been estimated using the contractual cash flows on the loans. IAS 39 requires the use of the expected cash flows but also allows for the use of contractual cash flows in instances where the expected cash flows cannot be reliably determined. However, the effective interest rate has been determined to be the rate that effectively discounts all the future contractual cash flows on the loans including processing, management fees and other fees that are incidental to the different loan transactions.

#### 4.2.6 Impairment on non-current assets

Determining whether non-current assets are impaired requires an estimation of the value in use of the cash-generating units to which assets have been allocated. The value in use calculation requires the Company to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. The assets were tested for impairment and there was no indication of impairment observed after testing. Therefore, no impairment loss was recognised during the year.

### 5. Revenue

The following is the analysis of the Company's revenue for the year from continuing operations (excluding investment income - see Note 7)

	<b>March 2017 N'000</b>	<b>March 2016 N'000</b>
Revenue from sale of petroleum products	<u>24,474,292</u>	<u>19,042,375</u>

5.1 All the sales were made within Nigeria.

### 6. Segment information

The reportable segments of Conoil Plc are strategic business units that offer different products. The report of each segment is reviewed by management for resource allocation and performance assessment.

Operating segments were identified on the basis of differences in products. The Company has identified three operating and reportable segments: White products, Lubricants and Liquefied Petroleum Gas (LPG). The White products segment is involved in the sale of Premium Motor Spirit (PMS), Aviation Turbine Kerosene (ATK), Dual Purpose Kerosene (DPK), Low-pour Fuel Oil (LPFO) and Automotive Gasoline/grease Oil (AGO). The products under the lubricants segment are Lubricants transport, Lubricants industrial, Greases, Process Oil and Bitumen. Products traded under LPG segment are Liquefied Petroleum Gas - Bulk, Liquefied Petroleum Gas - Packed, cylinders and valves.

Remittance in the year	(53,789)	(380,394)
<b>As at 31 March/December</b>	<b>17,675</b>	<b>18,009</b>

**26.4** Non-trade creditors represent sundry creditors balances for various supplies and contracts carried out but unpaid for as at 31 March 2017

NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

	March 2017 N'000	December 2016 N'000
<b>27. Distributors' deposit</b>		
At 1 January	502,859	501,697
New deposits	-	7,750
Refunds	-	(6,588)
<b>As at 31 March/December</b>	<b>502,859</b>	<b>502,859</b>

Distributors' deposit represents amounts collected by the Company from its various dealers and distributors as security deposit against the value of the Company's assets with these dealers.

**28. Decommissioning liability**

The following table presents the reconciliation of the carrying amount of the obligation associated with the decommissioning of the Company's signages and fuel pumps:

	March 2017 N'000	December 2016 N'000
At 1 January	52,141	38,200
Addition	-	11,840
Accretion	-	2,101
<b>As at 31 March/December</b>	<b>52,141</b>	<b>52,141</b>

Decommissioning liabilities is accounted for in accordance with IAS 37, Provisions, contingent liabilities and contingent assets and IAS 16, Property, plant and equipment. The associated asset retirement costs are capitalized as part of the carrying cost of the asset. Asset retirement obligations consist of estimated costs for dismantlement and removal of signages and pumps from dealer-owned service stations. An asset retirement obligation and the related asset retirement cost are recorded when an asset is first constructed or purchased. The asset retirement cost is determined and discounted to present value using commercial lending rate ruling at the reporting period. After the initial recording, the liability is increased for the passage of time, with the increase being reflected as accretion expense in the statement of profit or loss and other comprehensive income.

**NOTES TO THE FINANCIAL STATEMENTS (CONT'D)**

**29. Financial instrument**

**29.1 Significant accounting policies**

Details of the significant accounting policies and methods adopted (including the criteria for recognition, the basis of measurement and the bases for recognition of income and expenses) for each class of financial asset, financial liability and equity instrument are disclosed in the accounting policies in Note 3 to the financial statements.

**29.2 Significant accounting policies**

	March 2017 N'000	December 2016 N'000
<b>Financial asset</b>		
Loans and receivables:		
Cash and bank balance	50,050,189	42,295,355
Loans and receivables	15,302,709	16,012,972
	<b>65,352,898</b>	<b>58,308,327</b>
<b>Financial liabilities</b>		
Financial liabilities at amortized cost:		
Trade and other payables	41,241,352	35,203,058
Borrowings	11,281,421	8,990,872
	<b>52,522,773</b>	<b>44,193,930</b>

**29.3 Fair value of financial instruments**

The directors consider that the carrying amounts of financial assets and financial liabilities recorded in the financial statements approximate their fair values.

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 30. Financial risk management

Risk management roles and responsibilities are assigned to stake holders in the Company at three levels: The Board, Executive Committee and Line Managers.

The Board oversight is performed by the Board of Directors through the Board Risk and Management Committee.

The second level is performed by the Executive Management Committee (EXCOM).

The third level is performed by all line managers under EXCOM and their direct reports. They are required to comply with all risk policies and procedures and to manage risk exposures that arise from daily operations.

The Internal Audit Department provides an independent assurance of the risk frame work. They assess compliance with established controls and recommendations for improvement in processes are escalated to relevant management, Audit Committee and Board of Directors.

#### 30.1 Financial risk management objectives

The Company manages financial risk relating to its operations through internal risk reports which analyses exposure by degree and magnitude of risk. These risks include market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk.

#### 30.2 Interest rate risk management

The Company is exposed to interest rate risk because the Company borrows funds at both fixed and floating interest rates (overdraft). The risk is managed by the Company by maintaining an appropriate mix between short and long term borrowings. The risk is managed by the Company by constantly negotiating with the banks to ensure that interest are consistent with the monetary policy rates as defined by the Central Bank of Nigeria.

##### Interest rate risk

##### Sensitivity Analysis

At the reporting date the interest rate profile of the Company's interest-bearing financial instruments was:

Variable rate instruments:		March 2017	December 2016
Financial assets	0	-	-
Bank overdrafts	24.00%	11,281,421	8,990,872
		<b>11,281,421</b>	<b>8,990,872</b>

##### Sensitivity Analysis of variable rate instruments

A change of 200 basis points (2%) in interest rates at the reporting date would have increased/(decreased) equity and profit and loss after tax by the amounts shown below:

	Interest charged		Effect of Increase/ Decrease in Exchange Rate
31 March 2017	445,416	+/-2	46,882
31 December 2016	1,762,796	+/-2	185,540

NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

30. Financial risk management (Continued)

30.3 Foreign currency risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilizing forward foreign exchange contracts.

The carrying amounts of the Company's foreign denominated monetary assets and monetary liabilities as at 31 December 2016 are as follows:

	March 2017	December 2016
	N'000	N'000
<b>Assets</b>		
Loans and receivables:		
Cash and bank balance	41,963,358	41,455,281
Loans and receivables	-	-
	<b>41,963,358</b>	<b>41,455,281</b>
<b>Liabilities</b>		
Financial liabilities at amortized cost:		
Trade and other payables	22,185,290	11,938,232
	<b>22,185,290</b>	<b>11,938,232</b>

A movement in the exchange rate either positively or negatively by 200 basis points is illustrated below. Such movement would have increased/(decreased) the cash and bank balance by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables in particular interest rates remain constant.

Effect in thousands of Naira 31 March 2017	Foreign	Naira	Exchange Rate	Effect of
	Currency	Balance		Increase/ Decrease in
	US\$'000	N'000		Exchange Rate
USD	137,202	41,963,358	306	839,267

Effect in thousands of Naira 31 December 2015	Foreign	Naira	Exchange Rate	Effect of
	Currency	Balance		Increase/ Decrease in
	US\$'000	N'000		Exchange Rate
USD	33,663	10,250,531	304.5	205,011

The weakening of the naira against the above currencies at 31 December 2016 would have had an equal but opposite effect on the above currencies to the amount shown above where other variables remain constant.

30.4 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company uses publicly available financial information and its own trading records to rate its major customers. The Company's exposure and the credit ratings of its counterparties are monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.

NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

30. Financial risk management (Continued)

30.5 Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established a liquidity risk management framework for the management of the Company's short- medium - and longterm funding and liquidity management requirements. The Company manages liquidity risk by maintaining reserves, banking facilities and reserve borrowing facilities, by monitoring forecast and actual cash flows, and

**Financing facilities**

Unsecured bank loans and overdrafts payable at call and reviewed annually.

	March 2017 N'000	December 2016 N'000
Amount used	11,281,421	8,990,872
Amount unused	29,138,579	31,429,128
	<b>40,420,000</b>	<b>40,420,000</b>

**Liquidity and interest risk tables**

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the balance sheet date. The contractual maturity is based on the earliest date on which the Company may be required to pay.

31 March 2017	Weighted Average Effective Interest rate	0 - 3 Months N'000	3 month -1 year N'000	Total N'000
Trade and other payables	-	43,101,314	-	43,101,314

		<b>46,349,637</b>	<b>-</b>	<b>46,349,637</b>

**NOTES TO THE FINANCIAL STATEMENTS (CONT'D)**

**31. Gearing ratio and capital risk management**

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing returns to stakeholders through the optimization of the debt and equity balance. The Company's overall strategy remains unchanged from prior year.

The capital structure of the Company consists of debt, which includes the borrowings disclosed in, cash and cash equivalents and equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings as disclosed in relevant notes in the financial statements.

The Company is not subject to any externally imposed capital requirements. The gearing ratio at the period/year end is as follows:

	March 2017 N'000	December 2016 N'000
Debt	11,281,421	8,990,872
Equity	18,639,138	18,465,680
<b>Net debt to equity ratio</b>	<b>0.61</b>	<b>0.49</b>

Equity includes all capital and reserves of the Company that are managed as capital.

**32. Related party transactions**

During the year, the Company traded with the following companies with which it shares common ownership based on terms similar to those entered into with third parties as stated below:

31 March 2017	Sales of Goods N'000	Purchase of Goods N'000	Balance due (to)/from N'000	Deposits N'000	Overdraft and Term loan N'000

## NOTES TO THE FINANCIAL STATEMENTS (CONT'D)

### 32. Related party transactions (Continued)

The Chairman of the Company, Dr. Mike Adenuga (Jr.) GCON, has significant interests in Globacom Mobile Limited, Principal Enterprises, Southern Air Limited, Sterling Bank Plc (formerly Equitorial Trust Bank), Conoil Producing Limited (formerly Consolidated Oil Limited) and Synopsis Enterprises Limited.

During the period, the Company sold petroleum products - Premium Motor Spirit (PMS) and Automotive Gas Oil (AGO) to Globacom Mobile Limited and Conoil Producing Limited. It also sold Aviation Turbine Kerosine (ATK) to Southern Air Limited.

The Company also purchased goods from Globacom Mobile Limited and utilizes the service of Proline (WA) Limited to manage its stations.

### 33. Capital commitment

There were no capital commitments as at 31 March 2017 ( December 2016: nil).

### 34. Financial commitment

As at 31 March 2017, the Company had no outstanding letters of credit. (December 2016: Nil).

### 35. Contingent liabilities

The Company is currently in litigation with Vitol S A , one of its former suppliers of Automotive Gas Oil (AGO). The commercial dispute, which arose in 2008 has been through the High Court and Court of Appeal, and is currently at the Supreme Court. The amount being claimed by the supplier as breach of contract is \$43,262,497 (N13.5 billion). Whereas the judgments of the lower courts have been in favor of the supplier, the Directors, on the advice of the external solicitors, are of the opinion that the judgment of the lower court will be overturned by the Supreme Court. However, a provision of N2.6bn has been made in these financial statements to mitigate any possible future loss.

There are also a number of other legal suits outstanding against the Company estimated at N4.5 billion. On the advice of the Solicitors, the Board of Directors is also of the opinion that no material losses are expected to arise therefrom.

The Company is currently in litigation with Nimex Petrochemical Nigeria Limited, one of its former suppliers of products. In 2007, Nimex sued the company for US\$3,316,702.71 and US\$127,060.62 being demurrage and interest incurred for various supplies of petroleum products. The Federal High Court gave judgment in favour of Nimex in the sum of US\$13,756,728 which included the amount claimed and interest at 21% till judgment was delivered and also granted a stay of execution with a condition that the judgment sum be paid into the court. The court also granted a garnishee order against First Bank Plc to pay Conoil's money with the bank into the court. Conoil has appealed against the judgment to the Court of Appeal in Abuja. The appeal is pending and the Directors, on the advice of the external solicitors, are of the opinion that the judgement of the federal High Court will be overturned. The current value of the judgment sum is =N4.3b. However, a provision of N975m has been made in these financial statements to mitigate any possible future loss.
