Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

1. General information

Chemical and Allied Products Plc ('the Company') is a company incorporated in Nigeria. The Company is involved in the manufacturing and sale of paint. The address of the registered office is 2 Adeniyi Jones Avenue, Ikeja, Lagos.

The company is a public limited company, which is listed on the Nigerian Stock Exchange domiciled in Nigeria.

2. Summary of significant accounting policies

2.1 Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs). The financial statements have been prepared on a historical cost basis. The policies set out below have been consistently applied to all the years presented.

2.1.1 Going Concern

Nothing has come to the attention of the directors to indicate that the company will not remain a going concern for at least twelve months from the date of this financial statements.

2.1.2 Amended accounting standards adopted

The standards and interpretations listed below have become effective since 31 August 2016 for annual periods beginning on 1 January 2017. While the list of new standards is provided below, not all of these new standards will have an impact on this financial statements.

The following new standards and amendments became effective as of 1 January 2017:

- IAS 7 Disclosure Initiative - Amendments to IAS 7
- IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses - Amendments to IAS 12
- AIP IFRS 12 Disclosure of Interests in Other Entities Clarification of the scope of the disclosure requirements in IFRS 12

- IFRS 14 Regulatory Deferral Accounts
- Amendments to IFRS 11 Joint Arrangements: Accounting for Acquisitions of Interests
- Amendments to IAS 16 and IAS 38: Clarification of Acceptable Methods of Depreciation and Amortisation
- Amendments to IAS 16 and IAS 41 Agriculture: Bearer Plants
- Amendments to IAS 27: Equity Method in Separate Financial Statements
- Annual Improvements Cycle - 2012-2014
- Amendments to IAS 1 Disclosure Initiative
- Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception

(a) Amendments to IAS 16 and IAS 38: Clarification of Acceptable Methods of Depreciation and Amortisation

The amendments clarify the principle in IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is a part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortise intangible assets. The amendments do not have any impact on the Company, given that it has not used a revenue-based method to depreciate its non-current assets.

(b) Annual Improvements 2012-2014 Cycle

These improvements include:

IFRS 5 Non-current Assets Held for Sale and Discontinued Operations

IFRS 7 Financial Instruments: Disclosures

IAS 19 Employee Benefits

IAS 34 Interim Financial Reporting

These amendments do not have any impact on the Company.

2.1.3 Impact of new standards, amendments and interpretations

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective:

1. Amendments to IFRS 2: Classification and Measurement of Share-based Payment Transactions – 1 January 2018
2. Amendments to IFRS 4: Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts - 1 January 2018
3. Amendments to IAS 40: Transfers of Investment Property – 1 January 2018
4. IFRIC Interpretation 22 Foreign Currency Transactions and Advance Consideration – 1 January 2018
5. IFRIC Interpretation 23 Uncertainty over Income Tax Treatment
6. IAS 28 Investments in Associates and Joint Ventures - Clarification that measuring investees at fair value through profit or loss is an investment - by - investment choice – 1 January 2018
7. IFRS 16 – Leases – 1 January 2019
8. Amendments to IFRS 10 and IAS 28: Sale of Contribution of Assets between an Investor and its Associate or Joint Venture – Effective date has been deferred indefinitely
9. IFRS 17 – Insurance Contracts – 1 January 2021
10. IFRS 1 – First Time Adoption of International Financial Reporting Standards – Deletion of Short-term exemptions for first-time adopters – 1 January 2018.

Impact Analysis of IFRS 9 and IFRS 15

The following have been identified to be applicable to the Company's financial statements:

- i) *IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities*

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments that replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. IFRS 9 brings together all three aspects of the accounting for financial instruments project: classification and measurement, impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Except for hedge accounting, retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

a) Classification and measurement

Loans as well as trade receivables are held to collect contractual cash flows and are expected to give rise to cash flows representing solely payments of principal and interest. Thus, the company expects that these will continue to be measured at amortised cost under IFRS 9.

(b) Impairment

IFRS 9 requires the Company to record expected credit losses on all of its debt securities, loans and trade receivables, either on a 12-month or lifetime basis. The company applied the simplified approach and record lifetime expected losses on all trade receivables. The Company expects an impact on its equity due to unsecured nature of its receivables: it will need to perform a more detailed analysis which considers all reasonable and supportable information, including forward-looking elements to determine the extent of the impact.

IFRS 9 deals with accounting for financial instruments like loans and advances, customer deposits, government securities, cash, borrowings, debtors and creditors. The standard guides the classification and measurement, impairment and hedging of the financial instruments

The objective of this standard is to establish principle for the financial reporting of financial assets and financial liabilities that will present relevant and useful information to users of financial statements.

Our financial liabilities are measured at fair value through the statement of profit or loss and other comprehensive. Loan obtained from Bank of Industry has been assessed at fair value at initial recognition and subsequently carried at amortized cost.

(b) Hedge accounting

The company has no existing hedge relationships.

- ii) *IFRS 15, 'Revenue from contracts with customers'*

IFRS 15 was issued in May 2014 and establishes a five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The new revenue standard supersedes all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after 1 January 2018. Early adoption is permitted. Furthermore, the Company is considering the clarifications issued by the IASB in April 2016 and will monitor any further developments. The Company is in the business of sales and application of paints. The paints and services are sold both on its own in separate identified contracts with customers and together as a bundled package of goods and/or services.

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements

for the period ended September 30, 2018

(a) Sale of goods

This is a contract with customers in which the sales and/or application of paints is the performance obligation. The company recognises revenue at a point in time when control of the asset is transferred to the customer, generally on delivery of the goods and/or services

(b) Rendering of services

The Company provide application of paints after the sales of the products. Currently, the Company accounts for the sales of products and service as separate deliverables of bundled sales and allocates consideration between these deliverables using the as sales of goods and revenue from services. The Company recognizes service revenue by reference to the stage of completion. Under IFRS 15, allocation is be made based on relative stand-alone selling prices. As a result, the allocation of the consideration and, consequently, the timing of the amount of revenue recognised in relation to these sales may be impacted.

(c) Presentation and disclosure requirements

IFRS 15 provides presentation and disclosure requirements, which are more detailed than under current IFRS. The presentation requirements represent a significant change from current practice and significantly increases the volume of disclosures required in Company's financial statements. Many of the disclosure requirements in IFRS 15 are completely new. The Company has assessed the process of developing and testing of appropriate systems, internal controls, policies and procedures necessary to collect and disclose the required information.

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3, between an investor and its associate or joint venture, is recognised in full. Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that early adopts the amendments must apply them prospectively.

IAS 7 Disclosure Initiative – Amendments to IAS 7

The amendments to IAS 7 *Statement of Cash Flows* are part of the IASB's Disclosure Initiative and require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. On initial application of the amendment, entities are not required to provide comparative information for preceding periods. These amendments are effective for annual periods beginning on or after 1 January 2017, with early application permitted. Application of amendments will result in additional disclosure provided by the Company.

IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses – Amendments to IAS 12

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. Entities are required to apply the amendments retrospectively. However, on initial application of the amendments, the change in the opening equity of the earliest comparative period may be recognised in opening retained earnings (or in another component of equity, as appropriate), without allocating the change between opening retained earnings and other components of equity. Entities applying this relief must disclose that fact. These amendments are effective for annual periods beginning on or after 1 January 2017 with early application permitted. If an entity applies the amendments for an earlier period, it must disclose that fact. These amendments are not expected to have any impact on the Company.

IFRS 2 Classification and Measurement of Share-based Payment Transactions — Amendments to IFRS 2

The IASB issued amendments to IFRS 2 Share-based Payment that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. The amendments are effective for annual periods beginning on or after 1 January 2018, with early application permitted. The company has assessed the potential effect of the amendments on its financial statements.

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

IFRS 16 Leases

IFRS 16 was issued in January 2016 and it replaces IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset. Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset. Lessor accounting under IFRS 16 is substantially unchanged from today's accounting under IAS 17. Lessors will continue to classify all leases using the same classification principle as in IAS 17 and distinguish between two types of leases: operating and finance leases. IFRS 16 also requires lessees and lessors to make more extensive disclosures than under IAS 17. IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs. In 2017, the Company plans to assess the potential effect of IFRS 16 on its consolidated financial statements.

2.2 Segment reporting

Segment information is reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Executive Directors that make strategic decisions. A segment is a distinguishable component of the company that is engaged either in providing related products or within a particular service or in providing products or services in an economic (geographical) segment that is subject to risks and returns that are different from those of other segments.

2.3 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Naira (N), which is the company's functional currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within 'finance income or cost'.

(c) Foreign currency policy

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Notes to the financial statements

2. Summary of significant accounting policies (continued)

2.4 Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administration purposes, are stated at cost less any accumulated impairment losses (for land and buildings) and accumulated depreciation (for buildings). All other property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Costs include expenditure that is directly attributable to the acquisition of the items. Land and building comprise mainly of factories and offices.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost can be measured reliably. The carrying amount of the replaced cost is derecognised. All other repairs and maintenance are charged to the statement of profit or loss during the financial period in which they are incurred.

Land is not depreciated. Leasehold properties are depreciated over their useful lives, unless the lease period is shorter, in which case the lease period is used. Depreciation on other fixed assets is calculated using the straight line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Building on leasehold land	Shorter of useful life and lease terms (44 to 99 years)
Plant and machinery	3 to 43 years
Furniture and fittings	3 to 6 years
Tinting equipment	4 years
Motor vehicles	4 to 6 years

The assets' residual values and useful lives are reviewed and adjusted if appropriate, at the end of each reporting date.

2.5 Impairment of non-current assets

Where an indication of impairment exists, an asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (refer to impairment Note 2.6 for further details).

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the profit or loss for the period.

2.6 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the statement of profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Notes to the financial statements

2.6 Intangible assets - Continued

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit or loss and other comprehensive income in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss and other comprehensive income when the asset is derecognised.

Computer software

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the company are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software product so that it will be available for use;
- the directors intend to complete the software product and use it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives, which does not exceed five years.

Notes to the financial statements

2. Summary of significant accounting policies (continued)

2.7 Impairment of non-financial assets

Assets that are subject to depreciation and amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

2.8 Financial assets

2.8.1 Initial recognition and measurement

All financial assets are recognised initially at fair value plus in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Regular purchases and sales of financial assets are recognised on the trade date – the date on which the company commits to purchase or sell the asset.

2.8.2 Subsequent measurement

(i) Loans and receivables

This category is the most relevant to the company. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the EIR method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit or loss and other comprehensive income. The losses arising from impairment are recognised in the profit or loss in finance costs for loan and in the other operating expenses for receivables. The company's loans and receivables comprise 'trade and other receivables' and 'cash and cash equivalents' in the statement of financial position (Notes 17 and 19).

2. Summary of significant accounting policies (continued)

2.8 Financial assets (continued)

2.8.2 Impairment of financial assets (continued)

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of similar financial assets) is primarily derecognised (i.e., removed from the company's statement of financial position) when: The rights to receive cash flows from the asset have expired or the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without materials delay under a 'pass through' arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of its continuing involvement.

Impairment of financial assets

The company assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset, has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial re-organisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortised cost

For financial assets carried at amortised cost, the Company first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment. The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred).

Notes to the financial statements

2. Summary of significant accounting policies (continued)

The present value of the estimated future cash flows is discounted at the financial asset's original EIR. The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in the statement of profit or loss and other comprehensive income. Interest income (recorded as finance income in the statement of profit or loss and other comprehensive income) continues to be accrued on the reduced carrying amount using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the company, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider;
- it becomes probable that the borrower will enter bankruptcy or other financial reorganisation;

- the disappearance of an active market for that financial asset because of financial difficulties; or

- observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:
 - (i) adverse changes in the payment status of borrowers in the portfolio; and
 - (ii) national or local economic conditions that correlate with defaults on the assets in the portfolio.

2.8.3 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

2.8.4 Trade receivables

Trade receivables are amounts due from customers for goods sold in the ordinary course of business.

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

2.7.5 Financial liabilities

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction cost.

Notes to the financial statements

2. Summary of significant accounting policies (continued)

Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

2.8.6 Loans and borrowings

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss and other comprehensive income. For more information, refer to Note 20.

2.8.7 Government grant

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, which it is intended to compensate, are expensed. Where the grant relates to an asset, it is recognised as deferred income in equal amounts over the expected useful life of the related asset.

When the Company receives non-monetary grants, the asset and the grant are recorded gross at nominal amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset by equal annual instalments. When loans or similar assistance are provided by governments or related institutions with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant.

The company's government grant is presented in the statement of financial position by setting up a deferred income (named government grant. This is a Bank of industry loan grant as a result of reduction in interest rate which is below effective interest rate. No unfulfilled conditions exist in respect of the grant).

After initial recognition, the government grant is recognized as income in profit or loss on a systematic basis over the life of the loan.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss and other comprehensive income.

Notes to the financial statements

2. Summary of significant accounting policies (continued)

2.9 Inventories

Inventories are stated at the lower of cost and estimated net realisable value. Cost is calculated based on the actual cost that comprises cost of direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

2.10 Cash and cash equivalents

Cash and cash equivalents includes cash at bank and in hand plus short-term deposits. Short-term deposits have a maturity of less than three months from the date of acquisition, are readily convertible to cash and are subject to an insignificant risk of change in value.

2.11 Share capital

Ordinary shares are classified as equity.

2.12 Current and deferred income tax

The tax for the year comprises current (company income tax and education tax) and deferred tax. Tax is recognised in the profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is recognised in other comprehensive income or directly in equity, respectively.

The tax payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted at the reporting date.

Notes to the financial statements

2. Summary of significant accounting policies (continued)

2.12 Current and deferred income tax (continued)

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax is charged or credited to the profit or loss, except when it relates to items charged or credited to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the company intends to settle its tax liabilities on a net basis.

2.13 Employee benefits

The company operates a defined contribution plan. A defined contribution plan is a pension plan under which the company pays fixed contributions into a separate entity. The company has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

(a) Defined contribution schemes

i) Statutory contributions (Note 8): The Pensions Reform Act of 2014 requires all companies to pay a minimum of 10% of employees monthly emoluments to a pension fund on behalf of all full time employees.

ii) Voluntary contributions (Note 8): The company also contributes on an annual basis a fixed percentage of the employees salary to a fund managed by a fund administrator. The funds are invested on behalf of the employees and they will receive a payout based on the return of the fund upon retirement.

The contributions are recognised as employee benefit expenses when they are due. The company has no further payment obligation once the contributions have been paid. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payment is available.

Notes to the financial statements

2. Summary of significant accounting policies (continued)

2.13 Employee benefits (continued)

(b) Productivity incentive and bonus plans

All full time staff are eligible to participate in the productivity incentive scheme. The company recognises a liability and an expense for bonuses and productivity incentive, based on a formula that takes into consideration the profit attributable to the company's shareholders after certain adjustments. The company recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.14 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business, net of discounts, rebates and sales related taxes. Revenue is recognised when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the entity.

(i) Sale of goods

Revenue arises from the sale of paints and other decoratives and is recognised when the risks and rewards associated with ownership are transferred to the buyer. Due to the short term nature of these transactions no significant judgements are required.

(ii) Interest Income

Interest income is recognised using the effective interest method.

(iii) Rendering of services

Revenue arises from the use of assets and provision of technical support to the agents.

Revenue is recognized when services are rendered.

2.15 Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A lease is classified at the inception date of a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the company is classified as a finance lease.

Finance lease

Leases that transfer substantially all the risks and rewards incidental to ownership of an asset to another party, the lessee, are classified as finance leases. Title may or may not eventually be transferred. Where the company is the lessor, assets subject to finance leases are initially reported as receivables at an amount equal to the net investment in the lease. Lease income from finance lease is subsequently recognised as earned income over the term of the lease based on the effective interest rate method.

2.15 Leases - Continued

Operating lease payments are recognised as an operating expense in the statement of profit or loss and other comprehensive income on a straight-line basis over the lease term.

Company as a lessor

Leases in which the company does not transfer substantially all the risks and ownership of an asset are classified as operating leases. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.16 Fair value measurement

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- (a) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- (b) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value
- (c) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable:

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.17 Dividend distribution

Dividend distribution to the company's shareholders is recognised as a liability in the company's financial statements in the period in which the dividends are approved by the company's shareholders. In respect of interim dividends these are recognised once declared by the board of directors.

Dividend not claimed for over a period of 18 months are refunded back to the company and are treated as liability in the company's financial statements.

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

2. Summary of significant accounting policies (continued)

2.18 Risk management

The board through the Risk and Governance Committee has the responsibility for developing and implementing an enterprise - wide risk management framework for identifying, measuring, monitoring and controlling risks in the company. The executive management ensures the implementation of controls put in place to mitigate the various identified risks and report updates of status to the Board quarterly.

3. Financial risk management

3.1 Financial risk factors

The company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the company's financial performance.

(a) Market risk

(i) Foreign exchange risk

The company is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar as a result of importing key raw materials. Foreign exchange risk arises from future commercial transactions. There are limited exposures to recognised assets and liabilities.

The company manages its risk in the following ways: Scenario planning, information sharing within the group, In-plant tinting, local production of dulux trade bases, effective working capital management and planning, export drive, insurance, participation in MAN, NECA activities to influence government policies.

The company does not make use of derivatives to hedge its exposures. Letters of credit are issued by the company to the foreign suppliers for the purchase of materials. The Company does not hedge but buys from the official market to mitigate the difference between the official and parallel markets.

The company's foreign exchange risk is as follows:

	2018	2017
	N '000	N '000
Cash and short term deposits:		
Naira	2,683,952	2,780,902
USD	67,975	39,369
GBP	267	267
Total cash and short term deposits	<u>2,752,194</u>	<u>2,820,538</u>

Notes to the financial statements

4. Significant judgements and estimates

4.1 Significant estimates

The preparation of financial statement in conformity with IFRS requires the use of certain critical accounting estimates. In the process of applying the Company's accounting policies, management has exercised judgment and estimates in determining the amounts recognised in the financial statements. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. The areas where judgment and estimates are significant to the financial statements are as follows:

Property, plant and Equipment/Intangible assets

Estimates are made in determining the depreciation/amortisation rates and useful lives of these property, plant and equipment. These financial statements have, in the management's opinion been properly prepared within reasonable limits of materiality and within the framework of the summarised significant accounting policies.(refer to Note 2.4 for further details).

The amortisation period/useful lives of intangible assets also require management estimation.

Allowance for uncollectible accounts receivable and advances

The allowance for doubtful accounts involves management judgement and review of individual receivable balances based on an individual customer's prior payment record, current economic trends and analysis of historical bad debts of a similar type.(refer to Note 2.8.4 for further details).

Going concern

The Company's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continued in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

4.2 Significant judgements

No significant judgements were made during the year. There are no assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year

5. Segment reporting information

The Company

The chief operating decision-maker has been identified as the executive directors. The executive directors review the company's internal reporting on monthly income statement and financial position in order to assess performance and allocate resources.

The company generated all its revenue in Nigeria.

The company operates only in the decorative sector of paint industry hence all information on the statement of profit or loss and other comprehensive income and statement of financial position remains the same.

The executive directors assess performance of the operating segment based on profit from operations.

11. Taxation

	2018	2017
	N'000	N'000
<i>Current tax</i>		
Nigeria corporation tax charge for the year	576,788	453,960
<i>Deferred tax</i>		
Total deferred tax (Note 24)	-	-
Income tax expense	576,788	453,960

Nigeria corporation tax is calculated at 30% (2016: 30%) of the estimated assessable profit for the year.

The tax charge for the year can be reconciled to the profit per the statement of profit or loss as follows:

	2018	2017
	N'000	N'000
Accounting Profit before tax	1,802,463	1,418,625
Tax at the Nigeria corporation tax rate of 30% (2016: 30%)	540,739	425,588
Impact of disallowable expenses	-	-
Impact of Education tax	36,049	28,373
Prior year under provision	-	-
Impact of non-taxable income	-	-
Capital gain tax	-	-
Utilisation of previously unrecognised tax losses	-	-
	576,788	453,961
Effective tax rate	32%	32%
Income tax recognised in profit or loss		
Tax at the Nigeria corporation tax rate of 30% (2013: 30%)	540,739	425,588
Education tax	36,049	28,373
Prior Year Under Provision	0	0
Capital gain tax	0	0
Deferred tax charged/ writeback for the year	-	-
Tax charge for the year	576,788	453,961

12. Dividends

Amounts recognised as distributions to ordinary shareholders in the year comprise:

	2018	2017
	N'000	N'000
At 1 January	809,598	520,817
Approved dividend	1,435,000	1,540,000
Unpaid Dividend	389,043	389,043
***Dividend refunded	206,683	288,781
Payments during the year	(1,437,953)	(1,540,000)
At 30 September/December	1,402,371	1,198,641

**Unpaid Dividends are unclaimed over 12 years.

***The dividend refunded relates to a recall of dividend deposited with the Registrars which have stayed over and above 18 months.

13. Earnings per share

(a) Basic

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares in issue during the year.

	2018	2017
Weighted average number of ordinary shares in issue ('000)	700,000	700,000
Profit attributable to ordinary equity shareholders (N'000)	1,225,675	964,665
Basic earnings per share (kobo)	175	138
<i>(b) Diluted</i>	175	138

There were no potentially dilutive shares outstanding at 30 September 2018.

Advances to staff	118	344
	<u>538,413</u>	<u>110,701</u>

Movements in the provision for impairment of trade receivables are as follows:

	2018	2017
	N'000	N'000
At 1 January	19,643	20939
Additional impairment charge for the year	565	34
Receivables written off during the year		(1,330)
Unused amounts reversed		
At 30 September	<u>20,208</u>	<u>19,643</u>

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

17b. Trade and other receivables (continued)

Receivables due after one year, finance lease receivables

	2018	2017
	N'000	N'000
Gross investment in lease	91,601	91,601
Unearned finance income	(81,222)	(81,220)
Net investment in lease	10,379	10,381

Gross investment in lease

Gross finance lease receivable - minimum lease receivable		
- No later than 1 year	2,200	2,200
- 2 to 5 years	11,000	11,000
- More than 5 years	78,401	78,401
	91,601	91,601

Future finance income on lease	(81,222)	(81,220)
--------------------------------	----------	----------

Present value of finance lease receivable	10,379	10,381
--	---------------	---------------

The present value is analysed as follows:

- No later than 1 year	1,608	1,610
- 2 to 5 years	4,306	4,306
- More than 5 years	4,464	4,464
	10,379	10,381

The company has finance lease for a warehouse to a related party, MDS Logistics. The lease is for a total period of 51 years; of this period 42 years remain in the contract. The property reverts to the company at the end of the lease period.

18. Prepayments

	2018	2017
	N'000	N'000
Import prepayment	-	20,470
Other prepayments	93,422	47,050
Packaging Material	49,083	60,213
Insurance	4,687	17,187
	147,192	144,920

19. Cash and cash equivalents

	2018	2017
	N'000	N'000
Cash at bank and in hand	146,838	79,289
Short-term deposits	2,605,356	2,741,170
	2,752,194	2,820,459

Cash at banks earns interest at floating rates on daily bank deposit rates.

Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the company, and earn interest at the respective short-term deposit rates.

In 2015, Security and Exchange Commission directed all Registrars to return all unclaimed dividends, which have been in their custody for 15 months and above, to the paying companies. Included in the cash and short-term deposits is N1.12b which represents unclaimed dividends received from Africa Prudential Registrars as at 31st August 2018.

20. Interest-bearing loans and borrowings

Borrowing Current portions

Borrowing	17,631	77,631
	17,631	77,631

Grant Current portions

Grant	1,484	1,484
	1,484	1,484

The Bank of Industry granted N200m loan to the company for the procurement of plant and machinery for expansion of its production capacity at an interest rate of 10%. The tenor of the loan is 36 months. The company's grant is disclosed in the Financial statement because the interest on the loan is below the effective interest rate.

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

Notes to the financial statements

21. Trade and other payables

	2018	2017
	N'000	N'000
Trade payables	169,950	219,896
Royalty accrual	202,598	123,235
	372,548	343,131
Provision for employee leave	1,105	-
VAT payable	131,154	87,324
Withholding tax payable	2,069	3,946
Accrued marketing expenses	-	3,307
Accrued customers rebate	103,547	112,776
Dealer's reward payable	58,405	32,499
Accrued audit fee	14,770	18,900
Sundry creditors	51,491	49,236
Payable on import	57,120	-
Other accruals	152,446	90,672
	944,655	741,791
	2018	2017
Average credit period taken for trade purchases (days)	30	30

Trade payables comprise amounts outstanding for trade purchases and ongoing costs. The directors consider the carrying amount of trade and other payables to approximate its fair value.

Other accrual comprise other outstanding payments, accrued ITF, carriage and accrued employee incentives.

22. Share capital

	2018		2017	
	Number	Amount	Number	Amount
	'000	N'000	'000	N'000
Authorised:				
Ordinary shares of 50k each	840,000	420,000	840,000	420,000
Issued and fully paid:				
Ordinary shares of 50k each	700,000	350,000	700,000	350,000
Movements during the year:			Number of	Ordinary
			shares	shares
			'000	N'000
Balance at 1 January 2016			560,000	280,000
Bonus issue			140,000	70,000
At 30 September 2017			700,000	350,000
At 30 September 2018			700,000	350,000
Share premium			N'000	
			2018	2017
Balance at 1 January 2018			19,254	19,254
At 30 September 2018			19,254	19,254

Nature and purpose of reserves

The share premium reserve is used to recognise the amount above the par value of issued and fully paid ordinary share of the Company.

Chemical and Allied Products Plc
Notes to the Unaudited Financial Statements
for the period ended September 30, 2018

Notes to the financial statements

23. Reconciliation of profit before tax to cash generated from operations:

	Notes	2018 N'000	2017 N'000
Profit before tax		1,802,463	1,418,625
Depreciation of property, plant and equipment	14	68,570	61,084
Net foreign exchange loss	6	2,195	(239)
Amortization of Intangible assets	15	17,440	16,496
Profit on disposal of property, plant & equipment	6	(78)	(2,628)
Finance costs	10	3,270	3,503
Finance income	9	(218,909)	(163,096)
